

PERSONAL AND CONFIDENTIAL / SANDSON COSTA

To authenticate yourself on your company network, you will have to use a strong authentication password also known as an OTP code. This code will be generated by your smartphone and will change every time you use it.

The generated code is valid for the following account: **sandson.costa**
and you will have to use the following prefix PIN:

In order to install the code generator on your smartphone, you will have to follow the next three steps.

1) QRcode reader application installation

If your smartphone does not have a QRcode app yet, please install now such an application (like "ZXing barcode scanner" for Android, "Quick Scan" for iOS and "i-nigma" for Windows Phone).

2) OTP generator application installation

Install a compatible application on your smartphone. You can easily install this application by scanning (or clicking) this QRcode (valid for Android, iOS, Windows Phone, BlackBerry):

FreeOTP Authenticator / Authenticator / 2 Steps Authenticator

3) Token provisioning

The last step consists in inserting your personal token key generator into the application. Simply scan the QRcode printed below (or click on it directly from your smartphone).

Sandson Costa

If you need to generate your token with another application that doesn't support QRcode provisioning, you have all the details needed below:

- algorithm: **TOTP**
- secret seed: **8c6**
(or **RR**)
- number of digits: **6**
- time interval: **30**

0378
A3Y in Base32, like for Google Authenticator)

CODES ARE PERSONAL AND CONFIDENTIAL, KEEP THIS PAPER AT A SAFE PLACE OR DESTROY IT!

Congratulations, you are now ready to authenticate yourself on your company network.
